# Feature comparison

T.Flex is the TASSTA communications platform client, designed for portable touchscreen devices such as smartphones or tablets. It works over LAN, Wi-Fi, and any mobile network, like 3G or LTE.

T.Flex provides the full functionality of a professional two-way radio system, and extends it with powerful features: text and data exchange, positioning and navigation, activity history, lone worker protection, remote control, and many others.

T.Flex for Android comes in two editions:

- **T.Flex Smart:** full featured client with all functionality.
- **T.Flex PTT:** lightweight client with a focus on communication.

This document provides a feature comparison matrix for the various T.Flex editions to aid you in choosing the most suitable solution for your needs.

## Communication

Feature	T.Flex PTT	T.Flex Smart
